Meeting Minutes:

The **Waynedale 2040 Neighborhood Plan** Committee Meeting began at approximately 6:30 PM.

Project leader of the **Waynedale 2040 Neighborhood Plan,** Michael Terronez, opened with a thank you to the Committee Members who showed up to engagement events, shared the information to residents/businesses, and for the general support through the process.

Michael asked the Committee there perspectives and what they heard about the process and things that could be better. Going more door-to-door with locals, more presence on Facebook pages (e.g. neighborhood groups), and being more clear about the expectations were some of the feedback received.

The group then discussed and viewed the current engagement results from the summer. This conversation overlapped with the current timeline and expectations. Overall, a lot of the themes from input overlapped with he previous principles relating to infrastructure needs, community pride, neighborhood safety, and place/recreation. Folks highlighted a lot of positives for the Waynedale area: local businesses, neighbors, family friendly, and their parks are a few examples. Most concerns, needs, or request were related to sidewalk repairs, local business retention, more activities for families/children, and local activities to get everyone together (e.g. block parties).

The Committee began working on strategies portion of the Plan, and will continue to work on them the rest of this year.

The next Committee meeting will be held on **September 24, 2025**. The goal next meeting is showcase demographic data and work on strategies.
