In Your Neighborhood

Good News!
We are making repairs or improvements in your area.
Here are some details to let you know what is being done.

Project Name: 2025 Community Crossings Grant (Westchester/SW Waynedale); Res. No.: 0721C

Project Description: Reconstruction of concrete streets in the Westchester and SW Waynedale Neighborhoods. There will be subsurface drainage, sidewalk repairs, ADA curb ramps and miscellaneous drive approach improvements incorporated as well. Expect to see paint markings, construction equipment, staking and erosion control measures in and around your front yard. **PLEASE DO NOT DISTURB** as doing so will hinder construction. **Please Note:** If there are private facilities located in the public Right-of-Way (in-ground sprinkler systems/heads, invisible electric pet fences, etc.) please take care to have these items located and moved back behind the right-of-way in order that construction may take place. If they are damaged during construction, it will be the **homeowner's** responsibility to pay for any necessary repairs. (The R-O-W is typically located 25' either way of the street centerline.)

Parking: Parking and driveway access will be limited while construction is going on. You are allowed to park on open side streets after work has commenced for the day. While construction is occurring on your side of the street *and* while the concrete is curing (**min. 7 days**), your driveway will **not** be accessible. Please help neighbors out by letting them park in available open driveways if at all possible. Thank you.

Traffic Details: Expect Lane Restrictions throughout the neighborhood; **– please do not park in the open lane.**

Approximate Dates of Project: July 2025 – Late October 2026 Target Start Date: Late July 2025

Project Cost: / Scope: \$ 6,680,662.37

Prime Contractor/Contact Information: Malott Contracting, Inc. – Andy Schenkel – 260.385.1100

BE SAFE! Remember to always drive slowly and carefully in a construction zone!

Warning: A **seven (7)** to **fourteen (14)** day waiting period is required for proper curing of cement concrete pavement (i.e. roadway, alleys, and drive approaches) and curb. Please do **not** drive vehicles on new pavement **or** move barrels or barricades until properly cured or instructed to do so by City personnel. (Moving barrels/barricades is cause for fine(s) as per **City Ordinance 99.007.**)

Garbage/Recycle Collection

If construction is on your side of the street, garbage/recycle carts will need to be placed at the street for collection. It is recommended that residents tape a piece of paper with their address on the lid to help identify their carts. In instances where a cul-de-sac is under construction, residents should move their carts to the end of the street outside of the barricades for collection. If construction is in an alley, carts will need to be placed at the curb for collection. We recommend setting carts out the night before collection. Trucks will try to service the construction area first thing in the mornings by 6 a.m. before construction starts. In the event a resident has a disability and cannot move their cart outside the construction area, please contact the Solid Waste Dept. at 427-1345 for assistance. Thank you!

If you have construction questions, please contact the City's Project Manager: Greg Kreiger @ 260.427.2142

Sharon Tucker, Mayor
